

Vulcascot Lacing Cord

Product Information

PROFILE: Lacing Cord

Available in Black, Orange or Yellow

Vulcascot lacing cords are specifically designed for the lacing of cable forms. The nylon core ensures high tensile strength with minor extensions but has sufficient elasticity under low loads to make a neat cable form.

The outer P.V.C. sheath acts as a cushion preventing the cord from cutting into the cable insulation and prevents rattling.

There is a maximum limit on tensile strength to prevent excessive tension in lacing up.

- PVC Coated Nylon
- Available in 0.71mm (+/- 0.05mm) - 25m and 500m
- Also available in 1mm (+/- 0.05mm) - 25m and 500m
- Suitable for use in many industries - control panels, aircraft and military applications
- Used for the assembly of wiring looms and harnesses
- All dimensions are nominal and subject to manufacturing tolerances
