

Vulcascot Cable Protectors

Product Information

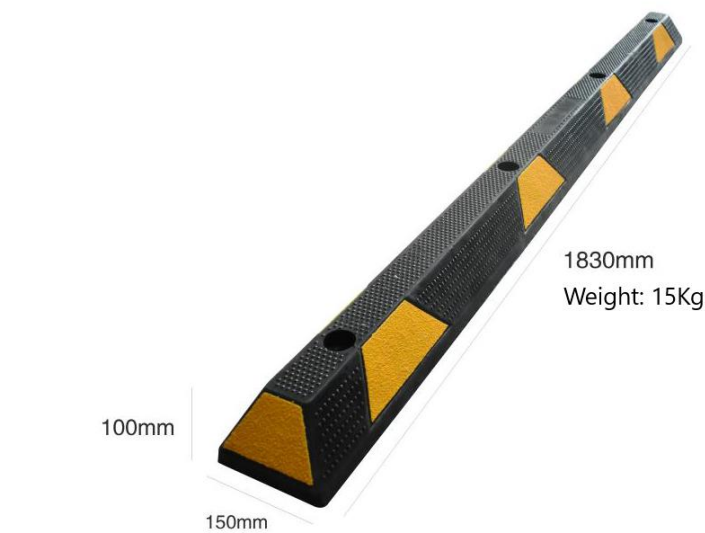

Kerb Stops (Wheel Stops)

Available in 2 sizes, 1830mm and 560mm

Kerb stops are used in car parks and garages to prevent vehicles making contact with walls or other hazards, ideally suited for protecting EV Charging Stations.

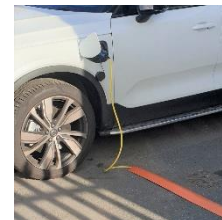

Manufactured from a high quality rubber compound they have large yellow reflective markings for high visibility day or night.

Optional Fixing set available complete with bolts, washers and rimless nylon hole plugs.

Size: 560*150*100mm
Weight: 4kg

Also Available – EV Charger cable protection
